REQUIREMENTS FOR ALCOHOL AND/OR DRUG TESTING

Alcohol Testing

We offer two options for alcohol testing. Option 1 is a choice from our all-inclusive testing packages that include pre-arranged sample collection and Expert Witness Statement (EWS). Option 2 is our standard testing service which does not include collection and EWS.

All-inclusive alcohol testing (includes collection and EWS)

- Hair Alcohol Testing:** Analysis for both FAEE and EtG alcohol markers (up to 3 months historical use). Includes collection and EWS.
- Blood Alcohol Testing:** Analysis for both Carbohydrate Deficient Transferrin (CDT) and Liver Function Test (LFT) (2-4 weeks historical use). Includes collection and EWS.
- Hair and Blood Alcohol Testing Package:** Blood Alcohol analysis (CDT and LFT) and Hair Alcohol analysis (FAEE and EtG). Includes collection and combined EWS.

Standard alcohol testing (excludes collection and EWS)

- Hair Alcohol Testing:** Combined FAEE and EtG alcohol markers (up to 3 months historical use).
- Blood Alcohol Testing:** Combined Carbohydrate Deficient Transferrin (CDT) and Liver Function Test (LFT) (2-4 weeks historical use).

Standard testing options include results reported by a Certificate of Analysis. Please tick here if a full interpretative **Expert Witness Statement** is required.

Randox Testing Services offer hair alcohol testing that covers up to three months historical use, as recommended by the Society of Hair Testing for chronic excessive alcohol consumption 2011, as standard. However, we can provide testing that covers up to six months historical use. Please tick here if a **six month assessment** is required.

Drug Testing

We offer two options for drug testing. Option 1 is a choice from our all-inclusive testing packages that include pre-arranged sample collection and Expert Witness Statement (EWS). Option 2 is our standard testing service which does not include collection and EWS.

All-inclusive drug testing (includes collection and EWS)

- Any three drugs covering up to three months (overview). Includes collection and EWS.
- Any three drugs covering up to three months (month-by-month). Includes collection and EWS
- Any three drugs covering up to six months (overview). Includes collection and EWS.
- Any three drugs covering up to six months (month-by-month). Includes collection and EWS.

Please note. Only head hair can be tested.

- Amphetamine Benzodiazepines inc. Diazepam Cannabis Cocaine Crack Cocaine Ketamine
- Opiates inc. Heroin and Codeine Mephedrone (MCAT) Methadone Methamphetamines inc. Ecstasy Subutex (Buprenorphine)
- Zolpidem Other

Please note. If testing is requested for either Amphetamine or Methamphetamines (inc. Ecstasy) the laboratory will test and invoice for both.

(form continues on following page)

Standard drug testing (excludes collection and EWS)

Sample type to be tested: Head hair Body hair Number of months the test is to cover (head hair only):

Period of detection: Month-by-month (segmented) Overview (see guidance notes for conditions)

- Amphetamine Benzodiazepines inc. Diazepam Cannabis Cocaine Crack Cocaine Ketamine
 Opiates inc. Heroin and Codeine Mephedrone (MCAT) Methadone Methamphetamines inc. Ecstasy Subutex (Buprenorphine)
 Zolpidem Other

Please note. If testing is requested for either Amphetamine or Methamphetamines (inc. Ecstasy) the laboratory will test and invoice for both.

Standard testing options include results reported by a Certificate of Analysis. Please tick here if a full interpretative **Expert Witness Statement** is required.

COLLECTION & ADDITIONAL INFORMATION

Sample Collection

Please select from the following:

Pre-arranged Collection via
RTS Assigned Collector (UK-wide
collection at your premises)

Pre-arranged collection at
RTS Manchester Collection Centre
(collection at our premises)

Pre-arranged collection at
RTS London Collection Centre
(collection at our premises)

Testing kits to be provided
for self-collection

Additional Information

If you have any additional comments please add them below.

Once completed please return this form via email, fax or post to receive a substance misuse testing quotation.

INSTRUCTION DETAILS

Please fill out the details in CAPITAL LETTERS to enable correct spellings to be achieved by the Radox Testing Services (RTS) Customer Service team.

Alcohol Testing

Hair alcohol testing cannot be segmented and cannot be carried out on body hair.

Testing for alcohol abuse is defined by somebody consuming at least 60 grams of alcohol per day on average over the time period tested for. Only head hair will be accepted for hair alcohol testing minimum length of 2cm post cutting of the sample required.

RTS offers two types of comprehensive alcohol testing. Our all-inclusive options include pre-arranged sample collection and the results of the analysis fully interpreted and reported via an Expert Witness Statement which can be used in court. The standard testing options do not include sample collection and the results are reported via a Certificate of Analysis only. The Certificate of Analysis can be used in court proceedings.

RTS offers, as standard, hair alcohol testing that covers up to three months historical use (as recommended by the Society of Hair Testing for chronic excessive alcohol consumption 2011). However, we can provide testing that covers upto six months historical use if required / court ordered (and there is at least 6 cms of hair available for testing). Please tick the relevant box if a six month assessment is required.

Hair Alcohol Testing – combined fatty acid ethyl esters (FAEE) and ethyl glucuronide (EtG) only. RTS does not offer FAEE or EtG testing in isolation.
 Blood Alcohol Testing – combined liver function test (LFT) and carbohydrate deficient transferrin (CDT) only. RTS does not offer FAEE or EtG testing in isolation. An LFT test is a snapshot of liver function at the time of sample collection and a CDT test provides a 2-4 week window of detection.

Drug Testing

RTS offers two types of comprehensive drug testing. Our all-inclusive options include pre-arranged sample collection and the results of the analysis fully interpreted and reported via an Expert Witness Statement which can be used in court. The standard testing options do not include sample collection and the results are reported via a Certificate of Analysis only. The Certificate of Analysis can be used in court proceedings.

Please note: Analysis can be provided as far back as the sample length allows.

Hair Type: Head Hair - 1 cm approximately equates to 1 month of analysis (minimum length of 1.5cm required) so for a test to cover a three month period the hair sample will need to be at least 3cm in length.
 Body Hair - Body hair cannot be segmented and will always give an average result of up to 12 months.

Type of Test: Month-by-month (segmented) - provides a greater level of detail. Historical drug use separated in approximately 1 month periods. (segmented testing is only applicable for head hair drug testing)
 Overview - Average historical drug use in the whole time period covered (in approximately 3 month periods).

Please select the sample type to be tested for drug analysis. A body hair sample can be used if there is little or no head hair; however due to its growth cycle only an overview analysis can be performed. We can also analyse urine and oral fluid samples, which cover a time period of up to four days and 24 hours respectively. Please call Customer Services on 0845 208 8099 for further information.

If you would like us to test for any substances which are not already detailed please indicate this in the 'Other' box.

Sample Collection

Our RTS assigned collection officers are trained to take hair, blood, urine and oral fluid samples throughout the United Kingdom and the Republic of Ireland. Collections can be carried out at any address to suit the donor (including prisons). RTS also has collection centres that donors can drop-in to at their convenience. To ensure the sample is taken under strict chain of custody conditions we strongly advise using an RTS assigned collecting officer/collection centre.

Manchester Collection Centre: Hexagon Tower, Ground Floor, Crumpsall Vale, Manchester, M9 8GQ – opening times 8:00 am – 6:00pm
London Collection Centre: Finsbury House, 23 Finsbury Circus, City of London, EC2M 7EA – opening times 8:00 am – 6:00pm

A copy of the Terms & Conditions and Technical Specifications, detailing the accreditation status with the precision and bias data of the analytes we can test, is available upon request.
