

RANDOX
TESTING SERVICES

COVID-19

PRIVATE TESTING SERVICE

Randox Testing Services can help manage COVID-19 risk and spread in your organisation with our rapid back to business service.

A simple swab test is all that is required to diagnose active COVID-19 infections, facilitating appropriate containment measures and reducing further spread of disease.

Currently being used rapidly in the UK government's COVID-19 testing programme, Randox are responsible for up to 17% of all tests conducted nationally at our ISO accredited laboratory.

Our pioneering test for COVID-19 utilises PCR to accurately and reliably diagnose COVID-19, thus facilitating appropriate containment and reducing further spread of disease. Our test comprises two tests for COVID-19; one specific and one confirmatory as recommended by the WHO.
